**DETAILED COURSE DESCRIPTION:** This course will provide detailed instruction for the design and installation of the INRB system. The course will require registrants to work in groups for each phase of the class. The installation portions will require the attendees to participate in actual construction of each phase to gain the necessary knowledge to understand the requirements of the construction of this non-proprietary system, built onsite system. Masters will be required to submit completed paperwork in order to receive Master credit.

**Instructor:** Roxanne Groover 4(B)

**IMPORTANT!!** Sign up ahead of time – classes may be cancelled if we do not receive enough registrations. Walk-ins are welcome, but please contact FOWA office prior to traveling to ensure class is still being held on same day/location.
